**TECHTIP**

**Why Should I Winterize  
My Spray Rig?**

Your spray rig and other equipment need attention as winter approaches. Just as we prepare our homes or cars for the harsh temperatures that the winter months bring, so should we prepare our equipment. Properly maintaining and prepping your rig and other equipment for the winter is essential to extending its life, avoiding downtime and costly maintenance come the spring. Performing a

few simple maintenance steps now can save you time and money in the future.

For specific steps on winterizing spray rigs, gas engines, electric motors and other treatment equipment, refer to the product manufacturer's guidelines. Another great resource is the Guide to Winterizing your Equipment, courtesy of Strike MAX™ found at: <http://bit.ly/35njTXZ>.
